

COMPANY PROFILE

HT Marine and Power is a family owned business that has been established for more than 25 years. The company has adapted, changed and grown over the years and is now firmly established as a stockist and supplier of OEM quality spare parts to the marine and industrial power sectors for both 2 and 4 stroke engines.

At the end of 2019, the decision was taken to rebrand the business and change the name from "Helptoday" to "HT Marine and Power". The reason for the name change was that we felt that the new name gives a better reflection of the markets that we operate in and the products that we supply.

Our aim is simple. We want to provide our customers with the best service possible. To do this we have invested in significant stock to support our customers` requirements. We work with our customers to understand their needs so that we have parts ready for immediate dispatch.

From the moment an inquiry is placed to when an order is dispatched, we try to make the whole process as seamless and as smooth as possible. Our customers are the cornerstone of our business so their satisfaction is all important to us.

We understand that customers want to deal with experts and need a fast turnaround thus reducing downtime and lost profit. This, coupled with our philosophy of fair play in business has allowed us to become a leading force in the procurement, stocking and delivery of fuel injection and engine parts to the marine and industrial sectors.

Our knowledgeable team can react immediately to your requests and, using our tailor made computer systems, can source and dispatch almost any spare part to anywhere in the world. Whatever it takes to source your spare parts, we'll do it - that's our guarantee.
